Step 3 is verified: Bob's slot resolves to 0xdd106493BAAc49828336d762AdA8a6031d286f06; you chose to use this address instead of the earlier supplied EOA. I've updated the guide and seed manifest. Step 4 — the app is already on Collector Bob's wallet page, with Collector Bob as the name. Leave metadata URI blank for now and click Register collector once. Wait for qBESU confirmation, then check for DID did:art:collector:0xdd106493baac49828336d762ada8a6031d286f06. What result do you see? *

Migration method for ArtIDWallet to quantumsafeblockchain
skip this step 9
Completed 6 steps in 38s
Step 9 is skipped—no Sunflowers transaction was started.
The open registry page currently shows The Scream and The Great Wave, plus Artist Alice and Collector Bob. All four records are listed. The Great Wave is already on-chain from the earlier creation, despite the later request to skip it.
You can treat the setup as complete for now. Don't click any Unlist buttons unless you intend to change a record's on-chain listing status.
skip the last two artwork registration. what is next
Completed 3 steps in 30s
Since you're skipping The Starry Night and Sunflowers, no more artwork registrations are needed. The Scream and The Great Wave are already registered.
Next: verify the records. On the Registered Artworks and Collectors page, click Refresh from qBESU and confirm it shows two artworks and two collectors, with the expected listed statuses.
After verification, the next optional demo flow is to transfer a listed artwork from Artist Alice to Collector Bob. The old resale payment remains a browser-only simulation; it won't execute on Besu.

skip this step 9
Completed 6 steps in 38s
Step 9 is skipped—no Sunflowers transaction was started.
The open registry page currently shows The Scream and The Great Wave, plus Artist Alice and Collector Bob. All four records are listed. The Great Wave is already on-chain from the earlier creation, despite the later request to skip it.
You can treat the setup as complete for now. Don't click any Unlist buttons unless you intend to change a record's on-chain listing status.
skip the last two artwork registration. what is next
Completed 3 steps in 30s
Since you're skipping The Starry Night and Sunflowers, no more artwork registrations are needed. The Scream and The Great Wave are already registered.
Next: verify the records. On the Registered Artworks and Collectors page, click Refresh from qBESU and confirm it shows two artworks and two collectors, with the expected listed statuses.
After verification, the next optional demo flow is to transfer a listed artwork from Artist Alice to Collector Bob. The old resale payment remains a browser-only simulation; it won't execute on Besu.

Migration method for ArtIDWallet to quantumsafeblockchain

skip this step 9

Completed 6 steps in 38s

Step 9 is skipped—no Sunflowers transaction was started.

The open registry page currently shows **The Scream** and **The Great Wave**, plus **Artist Alice** and **Collector Bob**. All four records are listed. The Great Wave is already on-chain from the earlier creation, despite the later request to skip it.

You can treat the setup as complete for now. Don't click any **Unlist** buttons unless you intend to change a record's on-chain listing status.

skip the last two artwork registration. what is next

Completed 3 steps in 30s

Since you're skipping **The Starry Night** and **Sunflowers**, no more artwork registrations are needed. **The Scream** and **The Great Wave** are already registered.

Next: verify the records. On the **Registered Artworks and Collectors** page, click **Refresh from qBESU** and confirm it shows two artworks and two collectors, with the expected listed statuses.

After verification, the next optional demo flow is to transfer a listed artwork from Artist Alice to Collector Bob. The old resale payment remains a browser-only simulation; it won't execute on Besu.
